Thornberry speaks at the Wise County GOP Women's Luncheon in Decatur

by Vella Alexander

Congressman Mac Thornberry was in Decatur on Monday, October 9, and was speaking at the Wise County GOP Women's Luncheon, at the Decatur Conference Center, West US Highway 380, Decatur.

The congressman talked about The Declaration of Independence, life, liberty, and the pursuit of happiness. He believes that we should protect our country.

We are spending 18-20% less on our military than before. Our military is the

smallest its ever been.

Changes need to be made in these four things;

Faith-is at its all time low.

Family-marriage rates are down 50%; 40% are single parent homes.

Community-the volunteers are becoming scarce.

Work-changes in the workforce, the average working male is age 25-54.

We have more on disability than other countries. The truth is harder to figure now, because of the internet, Twitter, Instagram, every-

thing is all online, it is our responsibility to figure out the truth, he said.

Some questions for the Congressman;

Where are you with our securities? We are still working on this and because of some of the illegal things that Obama did with the immigrants, Trumps hands are tied.

North Korea? Two words, it's back! Kim Jong-un military leader, dictator has launched another missile that can reach the United

States. They think Kim Jung-un wants to finish what his grandfather started many years ago, either hold us hostage or complete devastation.

Health Care? Health care premiums are sky high, and they are climbing.

In the last six months they have at least doubled. If you have Obama Care, your premiums are high and if you choose not to have insurance you are fined by the IRS, something to think about? Which is cheaper?
